BEHRMANN BUZZ

BEHRMANN COMPANY - 4173 Hoffmeister Avenue—St. Louis, MO 63125-2206
(314) 631-4400 FAX: (314) 638-5609 www.behrco.com

Special points of interest:

- * REYMSA Fiberglass cooling tower demo coming your way
- * Behrmann Company new hours to serve our customers better
- * Laclede Gas Energy Efficiency Rebate Program
- * Tiger Flow Engineered Packaged Pump Systems

REYMSA Fiberglass Cooling Tower Demo Unit

- In the Winter *Behrmann Buzz* we introduced you to the REYMSA one piece, fiberglass cooling tower and all of its features. Now, you can see one up close and personal. Your Behrmann Sales Engineer will be contacting you to set up a time to **bring the tower to you**. You can see for yourself why we're so excited about REYMSA corrosion resistant Cooling Towers.

Behrmann Company Expands Its Hours

BEHRMANN COMPANY has extended its office, parts and warehouse hours to accommodate our customers. We are now open from 7am to 5 pm Mon-Fri. Since our contractor customers start their day at 7 am, we wanted to cooperate with them and also provide better service to other customers who start early. We don't want you waiting on us, we want to wait on you! And don't forget we have emergency service & parts available for our products 24/7.

Laclede Gas Rebates

Laclede Gas has established the Commercial/Industrial Rebate Program which provides rebates for implementing a variety of natural gas energy efficiency improvements, including reimbursement for the

cost of an energy audit, new equipment purchases & tune-up service. Behrmann Company offers equipment & service that qualifies for this rebate. During these uncertain economic times, this could be beneficial in helping end users make a decision for

equipment or service expenditures. Your Behrmann Sales Engineer is familiar with the Laclede Gas rebate program and can help you implement it. Visit the Laclede Gas website www.lacledegas.com/conservation for more information.

Tigerflow Engineered Packaged Pump Systems available from Behrmann Company

TIGERFLOW & BEHRMANN COMPANY team up together to provide manufactured and tested packaged pump systems to meet in-the-field operating specifications before shipment. That means the unit arrives on site meeting and exceeding industry standards and site performance specifications.

TIGERFLOW packaged HVAC

pumping & control systems include full system integration of controls, mechanical & EMS interfaces; easy menu driven operation with industry-standard components and maintenance friendly layouts.

Tigerflow packaged booster systems include:

- Factory built, prefabricated & factory tested

- Third party certified—UL listed
- ASME Section 9 welding
- Single source responsibility
- NSF61 approved system
- Mounted Variable speed systems with panel stand & variable speed drives

Ask your Behrmann sales engineer for more information on Tigerflow Packaged Pump Systems.
