Power Flame Burners—The Market Leader

Power Flame has been the market share leader in forced draft gas, oil and gas/oil burners for many years, but now their share will grow dramatically due to a competitor discontinuing operations. No other manufacturer offers the breadth of line that Power Flame does, and most models are offered in optional Low NOx, HTD high turndown and linkageless configurations. Here is a reminder of the burners Power Flame offers:

X4 Series, 35-700 MBH
Gas only, regular & HTD

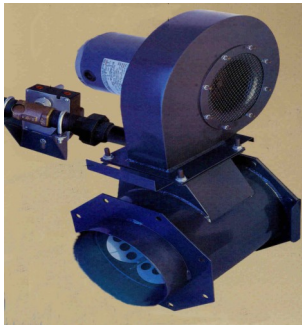

J Series, 300-2200 MBH
Gas only, regular & HTD

C Series, 98-19,100 MBH
Gas,oil, gas/oil, regular & HTD, Low NOx capable

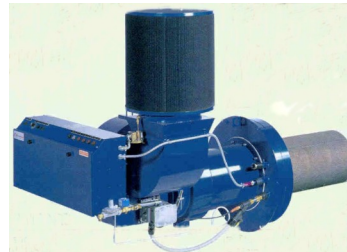

Cmax Series, 1,260-64,600 MBH
Gas,oil,gas/oil, regular & HTD, Low NOx capable

FD Series, 30-3,500 MBH
Gas only, for rooftop furnaces, HTD

Nova Premix, 400-2,200 MBH, gas only, affordable Low NOx without flue gas recirculation

Nova Plus, 2,000-64,200 MBH, gas only, ultra-Low NOx

AC Series, 420-19,100 MBH, air atomized light oil and gas, Regular & HTD, Low NOx capable

Adding low NOx to the burner makes it more environmentally friendly and is a green step. Adding linkageless controls enables burners to maintain a precise air/fuel ratio throughout their firing range to minimize combustion air, lower fuel consumption and increase efficiency, and it is a green step.

Contact your Behrmann Company sales engineer for assistance in selecting a burner for a new boiler or retrofitting existing boilers, furnaces and rooftop units with Power Flame forced draft burners to increase efficiency and participate in the green movement.
